As a UX Designer with 2+ years of experience, I can harness my skills and become a valuable player in your organization. I use **contextual inquiry**, **user interviews** and **personas** to extract pain points. I turn complex problems into simple flows with rapid sketching and iteration. My work spans across web, desktops, and mobile applications for both iOS and Android platforms.

WORK EXPERIENCE

UX Designer at Regenstrief Institute, Inc *June 2016 - present*

Lead participatory design session, contextual interviews and card-sorting sessions to understand end users. Design physical and digital products to aid older adults. Sketch, create wireframes, and prototype to test concepts and ideas with potential users. Collaborate with stakeholders to brainstorm on personas, and understand the problem space.

UX Consultant at WEDO Charity Auctions, LLC *Sept 2016 - present*

Increased website's conversion rates by 53% with new design workflow. Currently, identifying easy-to-fix usability issues by conducting a cognitive walkthrough and heuristic review. Restructure information presented to the users to improve efficiency and reduce errors. Create user flows with documentation to ensure cohesive product output.

UX Design Intern at NOMI Beauty *Feb 2016 - May 2016*

Designed and prototyped a mobile app from paper to a final product. Analyzed existing competitive products and adopted successful design patterns. Followed iOS design guidelines to craft a seamless user experience. Gathered feedback from potential users based on specific tasks. Co-ordinated with product manager and CTO to design features in Lean UX fashion.

UX Researcher at Health Innovation Lab, IUPUI *May 2015 - May 2016*

Created a simplified tablet interface for patients suffering from cognitive decline. Nine contextual inquiry sessions with clinic staff and patients to understand the problem space. Designed and created a functional prototype using HTML/CSS on an Android tablet. Conducted 3 rounds of usability tests with 15+ end users.
