Experience

User Experience Designer, Regenstrief Institute. Inc, June 2016 to Present

- Develop storyboards, wireframes, and functional prototypes to effectively communicate and validate design vision and user interaction specs
- Apply novel user research techniques and conduct usability tests to understand users and validate designs.
- Leading SCRUM meetings to manage smooth transition from design to development
- Working through the end-to-end design process from brainstorming ideas through creating assets and specs.

UX Designer (Intern), NOMI Beauty, Feb 2016 to May 2016

- Independently led the mobile design while collaborating with Product Manager and CTO
- Applied Lean UX methodology to design and develop product in incremental updates
- Created wireframes and several iterations of interactive prototypes to explore interaction patterns
- Worked in an Agile team to design iOS app from concept to execution

UX Designer (Volunteer), /Halvsies, August 2015 to May 2016

- Rapidly prototyped an interaction pattern which was well received by the Product Manager and the CEO
- Led the mobile UX design for the /Halvsies mobile app and delivered assets to the developer with detailed documentation

UX Research Assistant, IUPUI, August 2014 to May 2016

- Conducted 30 hours of ethnographic research with Eskenazi hospital patient population and clinic staff understand patients' workflow
- Participated in design sprints to conceptualize and strategize product decisions based on user observations
- Created a functional prototype on an Android device and successfully tested it with 24 older adults

Education

MS in Human Computer Interaction, GPA 3.96/4.00

Indiana University, Indianapolis, August 2014 – May 2016
